Hot Line Number	
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. In case of emergency, for additional information call 1-800-282-3171	

DIRECTION FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Sugar ants are usually found in kitchen and bathrooms searching for food. This bait is most successful when competing sources of food are sealed up and put away. This product is designed against Ghost ants, *Tampinoma melanocephalum*, and other sweet feeding ants.

Ant-Fix is very thick, no-drip, high grip formulation that allows the use on walls, under the counter and flat surfaces. Locate the foraging sugar ants*. Depress the plunger to dispense the bait in front of the foraging ant. Dispense about 1/2 – 1 inch of bait in each location. Dispense more bait in the ants trail and near their points of entrance to the house such windows, doors and cracks. If the tip of the syringe gets clogged due to the formation of solids, clear by using a paper clip.

*Place bait in areas inaccessible to children and pets.

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal.

Storage: Store product in original container in a cool, dry place out of reach of children and pets. **Disposal: If empty:** Do not reuse this container. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.
