## Section 4: First-Aid Measures

### Description of first aid measures

#### Inhalation

- IF INHALED: If breathing is difficult, remove person to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.

#### Skin

- IF ON SKIN: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

#### Eye

- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a poison control center or doctor for treatment advice.

#### Ingestion

- IF SWALLOWED: call a poison center or doctor if you feel unwell. Rinse mouth.

**Most important symptoms and effects, both acute and delayed**

- May cause allergic skin reaction. Z-9-Tricosene is a skin sensitizer. Refer to Section 11 - Toxicological Information.

**Indication of any immediate medical attention and special treatment needed****Notes to Physician**

- Treat symptomatically and supportively.

**Other information**

- None specified.

**Section 5: Fire-Fighting Measures****Extinguishing media**

**Suitable Extinguishing Media** • Use water fog, foam, carbon dioxide, or dry chemical.

**Unsuitable Extinguishing Media**

- Avoid heavy hose streams.

**Firefighting Procedures**

- Do not breathe gas/fumes/vapor/spray.  
As an immediate precautionary measure, isolate spill or leak area for at least 50 meters (150 feet) in all directions.  
Move containers from fire area if you can do it without risk.  
Eliminate ignition sources.

**Special hazards arising from the substance or mixture****Unusual Fire and Explosion Hazards**

- Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.

**Hazardous Combustion Products**

- Carbon monoxide and carbon dioxide.

**Advice for firefighters**

- Wear positive pressure self-contained breathing apparatus (SCBA).

**Section 6 - Accidental Release Measures****Personal precautions, protective equipment and emergency procedures****Personal Precautions**

- Avoid contact with skin, eyes, and clothing. Keep all sources of ignition away and avoid creating dusty conditions. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate enclosed areas.

**Emergency Procedures**

- Contain spill and monitor for excessive dust accumulation. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Keep unauthorized personnel away. Ventilate closed spaces before entering.

**Environmental precautions**

- No data available

**Methods and material for containment and cleaning up****Containment/Clean-up Measures**

- Avoid generating dust.  
Carefully shovel or sweep up spilled material and place in suitable container.  
Use appropriate Personal Protective Equipment (PPE)  
Use clean nonsparking tools to collect material.  
Dust Deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration.

**Section 7 - Handling and Storage****Precautions for safe handling**

**Handling**

- Avoid contact with skin or eyes. Keep out of the reach of children. Read label before use. Wash hands thoroughly with soap and water after handling. Avoid breathing dust. Do not use in areas without adequate ventilation. Take precautionary measures against static charges.

**Conditions for safe storage, including any incompatibilities****Storage**

- Store away from heat or open flame. Keep this product in its original container when not in use. Store in a cool, dry area that is inaccessible to children and pets.

**Incompatible Materials or Ignition Sources**

- Heat, sparks, open flame. Oxidizing agents.

**Section 8 - Exposure Controls/Personal Protection****Control parameters**

## Section 10: Stability and Reactivity

### Reactivity

- If material is released from water soluble pouch, powder is friable and can create small dust particles during any handling, processing, and transfer operations. This material can form explosive dust/air suspensions that are ignitable under some conditions.

### Chemical stability

- Stable under normal temperatures and pressures.

### Possibility of hazardous reactions

- Hazardous polymerization will not occur. May form combustible dust concentrations in the air.

### Conditions to avoid

- Heat, sparks, open flame, other ignition sources, and oxidizing conditions.

### Incompatible materials

- Strong oxidizers.

### Hazardous decomposition products

- Thermal decomposition may produce oxides of carbon.
